PRICE, 5 CENTS

QUARANTINE TO BE CONSIDERED

Formal Call Issued for Meeting at Chattanooga, Tenn., November 9.

VITAL QUESTIONS

In Development of the South are Involved.

IMMIGRATION QUESTION WILL ALSO BE DISCUSSED BY REPRESENTATIVES OF SOUTHERN STATES AND PROPER SAFEGUARDS RECOMMENDED—CALL SIGNED BY GOVERNORS OF TWELVE STATES.

By Associated Press. Chattanooga, Sept. 16.—A formal call for a conference of southern representatives to be held in this city on November 9 and 10 was issued today, signed by the governors of twelve southern states and officials of the Chambers of Commerce of ten cities. It is called to consider quarantine and immigration.

Those invited to attend are the governors of southern states, members of congress, commissioners of agriculture, mayors of cities, one representative from the national, state or city boards of health, one from each railroad system, the editor, publisher or proprietor of each newspaper and not more than five representatives from each commercial organization in the south. The call in full is as follows:

The call. In the development of the south, vital questions are involved aside from those which tend solely to its material growth and progress. Its matchless climate, generous soil, riches in minerals, fields and forests, its beauty in hills, valleys, fruits and flowers, its wealth in fountains, streams and rivers are indeed priceless gifts from nature's treasury, yet they are only some of the factors that contribute to the advancement and welfare of a people.

The possession of health, the cultivation of mind and morals, the establishment of right rather than might and the reign of truth and justice—these are the things more to be prized than all others for which mankind should strive, for these are the foundations on which the acis of Christian civilization must ever rest.

From time immemorial these are the standards by which the people of the south have sought to be measured and there is no stronger obligation resting on its citizens today than to earnestly desire and honestly endeavor to uphold these standards for the benefit of the present and future generations.

Heritage Menaced. To the thoughtful observer of passing events this proud heritage is being menaced from two sources at this time, and it is to emphasize this fact and concentrate public sentiment thereon, that this call for a Southern Immigration and Quarantine Conference is sent out.

In the attempt that has been made by various cities, towns and communities in the south to protect themselves from the dread ravages of yellow fever, the most strenuous and at times unreasonable, unnecessary and burdensome measures have been adopted, measures that not only tended to cripple and destroy business and commerce, but which reflected on the very instincts of our common humanity and became a reproach to civilization itself. It is evident, therefore, that some uniform system of quarantine should be adopted that will allay the apprehensions of the people, and minimize the dangers resulting from an outbreak of this disease. This is necessary if we should save our land from the demoralizing tendencies of a panic inspired quarantine.

Dangerous Immigrants. Again, there are coming into the United States at the present time larger numbers of foreign immigrants than ever before in our country's history. Among these are great masses, who are wholly undesirable and whom it will be impossible to assimilate with our institutions. There is apparent a desire or tendency to bring many of these undesirable immigrants to southern ports, and also to distribute them from northern centers, into the south. Unless proper safeguards are instituted now, these classes will come among us in such numbers as will inevitably lower our standard of citizenship, destroy our present peaceful labor conditions, and mongrelize our population.

The south will welcome desirable immigrants from any and all lands, but it has already racial problems of such gravity that no others should be invited until proper safeguards are provided in advance of their coming. For the foregoing reasons, therefore, the undersigned, having only the interests and welfare of the south at heart, hereby issue this, our call for a Southern Conference on Immigration and Quarantine, to be held in the city of Chattanooga, Tennessee, on November 9 and 10, 1905, and we designate the following persons as those expected to compose and participate in this conference: Governors of southern states; members of congress, commissioners of agriculture, mayors of cities, one representative from national, state, county or city boards of health, one representative from each railroad system, preferably the Central Immigration Agent, the editor, publisher or proprietor of newspapers, and not more than five representatives from each commercial organization in the south.

"MOVE ON" LAW WILL NOW BE ENFORCED

Mayor Bliss Asks that All Parties Who Have No Business There, Stay Out of Infected District.

The "move on" ordinance will be strictly enforced during the next few weeks in the area known heretofore as the infected district. The cordons about this district were removed last night by the state health authorities and persons are now allowed to come and go as they may see fit, but the mayor desires that persons refrain from entering that district unless on business.

The police will be instructed to disperse all crowds that have in the past congregated on corners in that section of the city, and, in fact, to strictly enforce the "move on" ordinance.

Parties who have no visible means of livelihood, and who have been in the habit of loafing around in that section of the city will be picked up by the police as vagrants and turned over to the criminal court for trial.

Will Be Kept At Work. The big gang of men, which has done such excellent work in cleaning up the infected district, under the supervision of Marshal Schadt, will continue at work. This was decided upon last night when the work in the district was completed. The gang of men will continue to be under the supervision of the marshal. Owing to the absence of Superintendent Gingles, who left the city when the fever was first announced, the duties of Acting Superintendent Spottswode have so increased that it was deemed advisable to leave this gang of men under control of the marshal, especially as the latter had accomplished such good results.

The city pay roll for the past week will probably be larger than ever before known, owing to the large number of extra men employed.

BASEBALL

September 16

By Associated Press.

Southern League.
Atlanta 8, Shreveport 2;
Nashville 5, Little Rock 3;
Birmingham 2, Memphis 2;
Montgomery 7, New Orleans 6, (first game).

Charleston-Macon, rain.

fore, the undersigned, having only the interests and welfare of the south at heart, hereby issue this, our call for a Southern Conference on Immigration and Quarantine, to be held in the city of Chattanooga, Tennessee, on November 9 and 10, 1905, and we designate the following persons as those expected to compose and participate in this conference: Governors of southern states; members of congress, commissioners of agriculture, mayors of cities, one representative from national, state, county or city boards of health, one representative from each railroad system, preferably the Central Immigration Agent, the editor, publisher or proprietor of newspapers, and not more than five representatives from each commercial organization in the south.

NEW ORLEANS IN HOLIDAY ATTIRE

Diamond Festival to Raise Funds Was a Brilliant Success.

FORTY-TWO NEW CASES AND TWO DEATHS THE RECORD TO 6 P. M.—AUTHORITIES AND PUBLIC REASSURED OVER SITUATION.

By Associated Press.

New Orleans, Sept. 16.—The official report to 6 o'clock is as follows:
New cases today 42; total to date 2,547.
Deaths today 2; total to date 333.
New foci 7.
Cases under treatment 341.
Cases discharged 1, 873.

NEW ORLEANS IN HOLIDAY ATTIRE

New Orleans, Sept. 16.—In the midst of their campaign against the yellow fever the people of New Orleans today took a holiday and joined hands in making a brilliant success of the diamond festival arranged to help swell the Citizens Fund. A stranger coming suddenly into the city today would have seen nowhere any evidence of the struggle against the plague. Business houses were gaily decorated with bunting, flags were on buildings in every street and the commercial district streets were filled with girls in summer attire and strains of lively music floated through the air while the sun shone on a community apparently in revelry. It will be several days before the actual amount realized by the diamond festival will be known. Only about \$11,000 is needed to make up the \$150,000 promised by the citizens.

Though there were a considerable number of new cases today the death list was again low and the situation is regarded by the authorities as favorable. With the recent jump in the number of cases a corresponding increase in the deaths was looked for and the mortality is therefore reassuring, not only to the authorities but to the public.

NORWAY AND SWEDEN MAY REACH AN UNDERSTANDING

Official Announcement is Made that the Negotiations May Reach a Definite Conclusion in Near Future.

By Associated Press. Karlstad, Sept. 16.—The first announcement indicating that the delegates of Norway and Sweden were approaching an understanding in their efforts to establish a modus vivendi for the country and as separate governments was given out tonight at the close of the joint session of delegates. The announcement reads:
"The probabilities are that in the near future the negotiations can be brought to a definite result."
This somewhat cryptic announcement is accepted as indicating that the negotiations have finally reached a stage where an agreement is in sight and a resort to arms, which might have involved other powers, may safely be considered out of the question.

FEAR MASSACRE AT BATUAM

By Associated Press. Odessa, Sept. 16.—Information received here from Batuum describes the situation there as very alarming. The authorities fear massacres there similar to those at Baku and have sent brigades of infantry and artillery to Batuum.

SEVERAL NEW CHOLERA CASES

By Associated Press. Berlin, Sept. 16.—The official bulletin of the cholera for the twenty-four hours ending at noon today shows three new cases and one death, making the totals to date 193 cases and 69 deaths. Four new cases and one death were reported from the Marienwerder district and one case and one death from the Dirschau district. One probable death from cholera is reported at Seitin.

PRESIDENT OF THE N. Y. LIFE WILL HAVE TO TESTIFY

New York, Sept. 16.—Announcement was made today that John A. McCall, president of the New York Life Insurance Co., had been subpoenaed by the Joint Insurance Committee to appear and testify before that committee when it resumes its sittings next week. Mr. McCall said he would tell all he knew when he appeared before the committee.

Judge Parkhill, although now residing in Tallahassee, will always have an interest in Pensacola, his old home, and his many friends are pleased to note that he has not forgotten the city at this time, when assistance is needed from every quarter.

FOREIGNERS BUY JAPANESE BONDS

By Associated Press. Tokio, Sept. 16.—According to reliable statistics the amount of foreign capital invested in Japanese industries at the beginning of the war was only one million dollars. Foreigners, it is said, have recently been eagerly buying Japanese bonds, causing an appreciation unexpected after an unsatisfactory peace. Quotations are now \$1.50 higher than at the beginning of the month.

FEVER SITUATION IN MISSISSIPPI

By Associated Press. Jackson, Miss., Sept. 16.—Following is the fever summary for Mississippi today:
Natchez, two new cases; Vicksburg, two new cases; Gulfport and Mississippi City, no new cases.
No reports were received from Pearl River and Hamburg.
No new points of infection have appeared in the state and no suspicious cases are under observation.

JUDGE PARKHILL GIVES \$10 TOWARDS THE FUND

Judge Chas. B. Parkhill, of the Florida Supreme Court, who formerly resided in this city, but who is now a resident of Tallahassee, has donated \$10 towards the fund that is being raised by the committee to assist in cleaning up the city.

FEVER REPORT IS ENCOURAGING

LOCATION FOR DETENTION CAMP

Dr. Porter and Surgeon Banks Will Meet To-day to Decide Upon Site.

The location of the detention camp for refugees from Pensacola will be definitely decided upon to-day. State Health Officer Porter will go to Flomaton today and meet Surgeon Banks and the two will come to a definite decision as to where the camp is to be located.

Dr. Porter intended making the trip yesterday, but the crash of business in his office prevented him from doing so, but this morning he will go out and select a site. There are several under consideration, and it is possible that a satisfactory one will be decided upon. The site formerly selected near Century has been abandoned, owing to the complaints that have been entered about its location at that point.

It is very probable that the camp will be located near Molino, where there is an excellent site offered. This will be looked over by the two officials, as will another place, which is between McDavid and Bluff Springs. The government owns a tract of land between these two towns which may be occupied, and if it is found suitable a camp will be placed there.

It is hoped by many who are desirous of leaving the city that the camp will be established as early as possible, but owing to the many objections the officials have so far been unable to secure a site.

NAN PATTERSON AGAIN MARRIED

By Associated Press. Washington, D. C., Sept. 16.—Miss Nan Patterson, who was twice tried in New York for the murder of Caesar Young, a bookmaker, was remarried here at noon today to her former husband, Leon G. Martin. The ceremony was performed at the Patterson home and was witnessed only by members of the family and a few intimate friends. The couple left in the afternoon for New York, where they will reside. Miss Patterson and Mr. Martin were divorced three years ago.

WILL NOT ENJOIN MILL MANAGEMENT

By Associated Press. Asheville, Sept. 16.—Argument was concluded before Judge Pritchard this afternoon in the United States Circuit Court on the rule to show cause why W. E. Lucas, president and treasurer of the Laurens, S. C., cotton mills, should not be enjoined from further proceeding in the state courts of South Carolina against Deering, Milliken & Company, of New York, and also why the present board of directors of the mill should be removed.

Although Judge Pritchard did not formally deliver his decision he plainly stated he was of the opinion that complainants were in no danger of suffering irreparable injury at the hands of the present management. A decision along these lines, refusing to remove the board of directors, will probably be delivered in a few days.

Suicide Identified as Son of a Wealthy Georgian

By Associated Press. New York, Sept. 16.—The body of the suicide who ended his life by hanging last night at Mamaroneck, near this city, was positively identified today as that of a young man who had represented himself to be William A. King, the son of a wealthy cotton mill owner of Augusta, Ga. The identification was made by Mrs. Geo. E. Jardine, at whose house the young man stopped for shelter during a severe storm last Monday. The young man represented himself as penniless having spent all of his allowance, and said he had been warned by his father if he overruled his income he would have to shift for himself and the next installment was due.

Quarantine Cordon Around Infected District Has Been Removed.

2 CASES REPORTED

No Suspicious Cases Reported Within the City Limits.

THE TWO NEW CASES REPORTED ARE BOTH WITHIN THE DISTRICT OF ORIGINAL INFECTION AND ONE MAY PROVE FATAL—MAYOR BLISS PROTESTS AGAINST ADMITTING TRAVELERS.

A summary of the fever situation up to last night is as follows:
New cases, two; total to date, 43.
Deaths, none; total to date, nine.
Cases under treatment, 9;
cases discharged, 25.

Two new cases, no deaths and no new doubtful cases was the report received last night from the office of the State Board of Health. The report is encouraging, in that it was almost an assured fact that the two cases would develop, though the physicians were careful to make a thorough diagnosis of the cases before they were pronounced yellow fever.

The new cases are:
William T. King, No. 120 East Government street.
Mary Montgomery, (colored), No. 211 East Romana street.

Of the two cases only that of King is likely to prove fatal. It is stated that he has been walking about the city for two or more days with fever, and his case was not reported until yesterday, when it was found that he had a pronounced case of yellow fever. His condition is quite serious and it is feared that he will not recover from the attack.

No Suspicious Cases. For the first day since the discovery of yellow fever, there were no suspicious cases under treatment last night and it is hoped that none may develop. Dr. Porter stated last night that there were quite a number of cases of malaria and typhoid fever in the city. In explanation of the heavy death rate Dr. Porter said that this was partly due to the fact that two or three cases had been reported to the physicians, or rather found by them, when the patients were almost dead, and beyond being saved, which, being considered would reduce the death rate considerably.

Examination of Blood. It was stated yesterday morning that the blood of patients under suspicion was sent to Jacksonville to the state laboratory for examination, this being for the purpose of ascertaining whether or not the patient had yellow fever. While this is done, it is not for this purpose, but on the other it is a negative diagnosis, and to ascertain whether or not the patient has malaria or typhoid fever. When this is learned the physicians can diagnose the case much more intelligently.

Cordon Removed. The cordon, which was placed around the infected district several weeks since, was removed last night by order of Dr. Porter. His bulletin, No. 14, is as follows:

Pensacola, Fla., Sept. 16.—Removal of Sanitary Cordon within the City of Pensacola.
"1.—The Sanitary Cordon established within the City of Pensacola on August 29th is hereby removed.
"2.—Screening and fumigation of houses where yellow fever may develop or may be found will be continued."
(Continued on Page Three.)

THE BEEF TRUST ATTORNEY: "NOW, JUDGE, HOW CAN YOU HAVE THE HEART TO TRY SUCH A POOR, INNOCENT, HELPLESS, LAW-ABIDING ANGEL AS MY CLIENT?"
THE BEEF TRUST TRIALS WILL BEGIN ON SEPTEMBER 18.—News item.
